

Effective Data Science Infrastructure: How to make data scientists productive

Do you have a personal manual of life principles to live by? What adages do you use to guide you in your everyday living?

Today, I'd like to share a list of 101 important life principles to live by in life. This list is a compilation of important life lessons I've learned at one point or another and it pertains to different areas of life from dealing with people, to our emotions, to life's challenges, to achieving success, to handling failure. I'd say that this list is like a cheat sheet to many of the articles at Personal Excellence, because it embodies many of the principles and virtues I write about here.

Even though this list has 101 points, don't overwhelm yourself by reading and applying all the points right away. These principles are meant to be read and reflected on over time, as opposed to being a checklist that you tick off. As you read each point, think about the truth behind this principle, how it applies to your life, and the actions you should take in accordance to this principle.

For example, with the first principle "Ability is more of a function of the time you spend honing your craft, rather than a result of what you were born with," think about the skills that are important in your work and life. Next, identify ways you can hone them. Then, commit to these steps with a deadline and act on them. :)

Another example: with the second principle on "Abundance," think about whether you tend to act with a scarcity or an abundance mindset. Do you always fear that you can't succeed, or that people are going to rip you off, or that you won't get enough of something? This is a scarcity, fear-based mindset. How can you switch to an abundance mindset, which is a mindset that helps you focus on opportunities, love, and abundance, such that you can then create such an outcome for yourself?

I now present to you 101 life principles, written by yours truly:

What principles above resonate with you? What can you start applying today?
