Open to PhD applications in the field of Self-harm - A proposed mixed methods study will appeal to candidates keen to work with a large data set, it utilises data from the Belfast Youth Development Study (BYDS) to advance public health knowledge on self-harm among young people. The Belfast Youth Development Study (BYDS) is a longitudinal cohort study involving over 4000 young people in Northern Ireland " the study spanned ages 11 to 21 years (2001-2011) and included over 40 schools. Over time comprehensive data on substance use, mental health, self-harm, family, schools, neighbourhoods, offending behaviour was Methodology - Phase 1 (quantitative phase) multilevel logistic regression/multilevel models (qualitative phase), the results of the quantitative analysis will be used design an interview schedule which aims to shed light on the nature of the relationship between the predictors and self-harm behaviour.

A proposed mixed methods study will appeal to candidates keen to work with a large data set, it utilises data from the Belfast Youth Development Study (BYDS) to advance public health knowledge on self-harm among young people. The Belfast Youth Development Study (BYDS) is a longitudinal cohort study involving over 4000 young people in Northern Ireland " the study spanned ages 11 to 21 years (2001-2011) and included over 40 schools. Over time comprehensive data on substance use, mental health, self-harm, family, schools, neighbourhoods, offending behaviour was - Phase 1 (quantitative phase) multilevel logistic regression/multilevel models (qualitative phase), the results of the quantitative analysis will be used design an interview schedule which aims to shed light on the nature of the relationship between the predictors and self-harm behaviour. Sexual-health This project aims to focus on sexual activity indicators and how these are shaped by family context , peers , schools , other risky child behaviours and outcomes in late adolescence and early adulthood. These aims will be achieved via secondary analysis of the Belfast Youth Development Study (BYDS), a longitudinal cohort study of over 4000 young people form Belfast, Ballymena and Downpatrick. BYDS collected seven sweeps of data over a ten year period (2001-2011) spanning ages 11-21 years

This project aims to focus on sexual activity indicators and how these are shaped by family context , peers , schools , other risky child behaviours and outcomes in late adolescence and early adulthood. These aims will be achieved via secondary analysis of the Belfast Youth Development Study (BYDS), a longitudinal cohort study of over 4000 young people form Belfast, Ballymena and Downpatrick. BYDS collected seven sweeps of data over a ten year period (2001-2011)

spanning ages 11-21 years Secondary Trauma - The proposed study will use data from the 2018/19 Belfast Youth Development feasibility study (BYDS) which includes a comprehensive range of measures related to trauma and secondary trauma (n = 360). A subsample of these participants (aged 30 years), including those who previously reported a secondary trauma, will be followed up to allow in depth analysis of trauma transmission. Dr Mary-Carmel Kearney School of Pharmacy Open to PhD applications in the field of Proprietary Dispensing, Responding to Symptoms., ... Open to PhD applications in the field of Proprietary Dispensing

Responding to Symptoms. School of Pharmacy

Dr Stephen Kelly School of Pharmacy Microbiome exploitation for biotechnology, Extremophile biocatalysis for the pharmaceutical industry, Clinical environmental microbiome analysis, ... Microbiome, Biocatalysis, Biotechnology, Extremophile Microbiome exploitation for biotechnology

Extremophile biocatalysis for the pharmaceutical industry

Clinical environmental microbiome analysis

School of Pharmacy

Dr Vicky Kett School of Pharmacy Open to PhD applications in the field of pharmaceuticals, vaccine technology, mucosal and thermal analysis including amorphous and polymorphic systems. ... Open to PhD applications in the field of pharmaceuticals, vaccine technology, mucosal and thermal analysis including amorphous and polymorphic systems. Novel mucosal delivery of biofilm penetrating antibiotics

Vaccine delivery via mucosal routes

Novel spray-dried powders for delivery to the lung School of Pharmacy

Prof Dimitrios Lamprou School of Pharmacy 3D Printed drug delivery systems & medical devices., Bioprinting applications in drug delivery systems and tissue engineering., 4D printing in ca... 3D Printed drug delivery systems & medical devices.

Bioprinting applications in drug delivery systems and tissue engineering.

4D printing in cancer management.

Manufacturing of nanofibers for drug delivery and tissue engineering applications.

Nanomedicine development using microfluidics. School of Pharmacy

Dr Eneko Larraneta School of Pharmacy Dr. Larrañeta is interested in the development of medical devices for sustained drug delivery. These type of systems can be applied to treat a ... Long-acting drug delivery / Implantable devices / Medical devices / 3D-printing Dr. Larrañeta is interested in the development of medical devices for sustained drug delivery. These type of systems can be applied to treat a wide variety of diseases ranging from chronic conditions,

such as schizophrenia or Parkinson's disease to cardiovascular disease. If you are interested in the development of such systems please contact Dr. Larrañeta to discuss ideas and/or possible collaborations. School of Pharmacy

Dr Garry Laverty School of Pharmacy Open to PhD applications in the field of peptide-based hydrogel materials as long acting injectables, within drug delivery, biomaterials and as antimicrobials. Open to PhD applications in the field of peptide-based hydrogel materials as long acting injectables, within drug delivery, biomaterials and as antimicrobials. School of Pharmacy

Dr Shu Li School of Pharmacy Open to PhD applications in the field of Multi-component pharmaceutical materials (including pharmaceutical cocrystals), Mechanochemical synthesis. Open to PhD applications in the field of Multi-component pharmaceutical materials (including pharmaceutical cocrystals)

Mechanochemical synthesis

Enabling formulation strategies and medical device preparation via hot-melt extrusion. School of Pharmacy

Professor Karl Malcolm School of Pharmacy Karl is open to applications for postgraduate research from suitably qualified applicants who meet the University's English language requirements (<https://www.qub.ac.uk/Study/international-students/Applying/EnglishLanguageRequirements/>), who have secured a source of funding for their studies, and who wish to pursue a research project in a relevant research topic. modified release drug delivery systems • sustained and controlled release • women's sexual and reproductive health • vaginal drug delivery • vaginal ring technology • polymeric drug delivery devices • subdermal implants • injection molding and extrusion technologies • human immunodeficiency virus (HIV) • HIV microbicides • contraception • non-hormonal contraception • antiretrovirals for HIV prevention • multipurpose prevention technologies (MPTs) • mucosal vaccination • silicone elastomers Karl is open to applications for postgraduate research from suitably qualified applicants who meet the University's English language requirements (<https://www.qub.ac.uk/Study/international-students/Applying/EnglishLanguageRequirements/>), who have secured a source of funding for their studies, and who wish to pursue a research project in a relevant research topic. modified release drug delivery systems

sustained and controlled release

vaginal drug delivery

vaginal ring technology

polymeric drug delivery devices

injection molding and extrusion technologies

human immunodeficiency virus (HIV)

HIV microbicides

antiretrovirals for HIV prevention

multipurpose prevention technologies (MPTs)

mucosal vaccination

silicone elastomers

polyurethanes

ethylene-vinyl acetate copolymers

in vitro release testing of drug dosage forms

protein drug delivery

long-acting contraceptives

long-acting injectables

3D-printing of drug delivery systems

bacterial vaginosis (BV)

estrogen replacement therapy

cervical ripening

induction of labour School of Pharmacy

Dr Maryam Malekigorji School of Pharmacy Not currently accepting PhD students, ... Nanomedicine, Metallic Nanoparticles, Photothermal Ablation, Thermo-responsive Drug Delivery, Cancer Therapy Not currently accepting PhD students School of Pharmacy

Professor Lorraine Martin School of Pharmacy Open to PhD applications in the field of: Chronic airways diseases, to include cystic fibrosis, COPD, bronchiectasis & asthma, with a particular e... Cystic fibrosis, COPD, proteases, ENaC, ion channels, infection, inflammation. Open to PhD applications in the field of: Chronic airways diseases, to include cystic fibrosis, COPD, bronchiectasis & asthma, with a particular emphasis on: Proteases as potential biomarkers and therapeutics targets;

Ion channel modulation, airways hydration & mucociliary clearance;

Infection and inflammation. School of Pharmacy

Professor Helen McCarthy School of Pharmacy Open to PhD applications in the field of nano-drug delivery, biopharmaceutics, vaccine technology, repurposing of phosphate-based drugs, nucleic acid ... Nanomedicine; Drug Delivery; Cancer; Non-Viral; Peptides; Nucleic Acids; Gene Therapy; Vaccines; Bone Regeneration; Wound Healing; Bioengineering; Biomaterials. Open to PhD applications in the field of nano-drug delivery, biopharmaceutics, vaccine technology, repurposing of phosphate-based drugs, nucleic acid therapies and bone repair. Development of nanomedicines for cancer

Design of non-viral delivery systems

Bioengineering for regenerative therapies School of Pharmacy

Professor Colin McCoy School of Pharmacy Open to PhD applications in the field of Drug delivery, Biomaterials, Sensor development, SMART materials and medical device enhancement., Polymer an... Open to PhD applications in the field of Drug delivery

Biomaterials

Sensor development

SMART materials and medical device enhancement.

Polymer and small-molecule synthesis

Materials characterisation

Biological and microbiological performance School of Pharmacy

Professor James McElnay School of Pharmacy Not recruiting new PhD students at present due to senior management role in University.... Not recruiting new PhD students at present due to senior management role in University. School of Pharmacy

Dr Emma McErlean School of Pharmacy Dr. McErlean is currently offering a fully funded PhD studentship focusing on the development of non-viral delivery systems for ex vivo genetic modifi... Cell Penetrating Peptides Gene Delivery Gene Therapy Nanomedicine Targeted Treatments Ex vivo Adoptive Cell Therapies Dr. McErlean is currently offering a fully funded PhD studentship focusing on the development of non-viral delivery systems for ex vivo genetic modification of natural killer cells for adoptive cellular therapies. School of Pharmacy

Dr. Alejandro J. Paredes School of Pharmacy Open to PhD applications in the field of: Drug nanosuspensions , Mucosal drug delivery, Bioadhesive materials for drug delivery and patient mo... Nanocrystals, pharmacokinetics, lymphatic targeting, brain targeting, HIV Open to PhD applications in the field of: Drug nanosuspensions

Mucosal drug delivery

Bioadhesive materials for drug delivery and patient monitoring

3D-printed dosage forms

Nose-to-Brain drug delivery

Delivery of therapeutics for neglected diseases and HIV School of Pharmacy

Dr Carole Parsons School of Pharmacy Open to PhD applications in the field of Medicines use and optimisation in palliative, hospice and end of life care, ... medicines optimisation, prescribing, palliative care, hospice care, advanced dementia, cancer Open to PhD applications in the field of Medicines use and optimisation in palliative, hospice and end of life care School of Pharmacy

Dr Laura Sherrard School of Pharmacy Open to PhD applications in the field of microbiology, molecular biology, and microbial genomics ... Open to PhD applications in the field of microbiology, molecular biology, and microbial genomics School of Pharmacy

Prof Thakur Raghu Raj Singh School of Pharmacy Open to PhD applications in the field of drug delivery Controlled drug delivery systems for treating a range of chronic disorders, Small and Bio... Ocular drug delivery Long-acting implants Microparticles drug delivery Nanoparticles drug delivery Biologics delivery Electrospinning Injectable implants Open to PhD applications in the field of drug delivery Controlled drug delivery systems for treating a range of chronic disorders

Small and Biologics delivery using novel platforms such as injectable implants, preformed implants, microparticles and nanoparticles for treating a range of ocular disorders

Synthesis and characterisation of block copolymers

Electrospinning based drug delivery systems for improved topical drug delivery

Thermoresponsive and in situ depot forming hydrogel-based systems

Nanoparticles-based to provided improved drug loading and penetration properties across biological barriers

Microneedles as minimally invasive delivery systems for transscleral and transcorneal delivery

Medical devices for ocular and transdermal applications School of Pharmacy

Dr Timofey Skvortsov School of Pharmacy Open to PhD applications in the following areas: Synthetic biology and genetic engineering of bacteriophages and their proteins, Structural biology o... Bacteriophages, antimicrobial resistance, genomics, bioinformatics, protein modelling, microbiomes, genetic engineering, biofilms, protein evolution, synthetic biology, endolysins, depolymerases Open to PhD applications in the following areas: Synthetic biology and genetic engineering of bacteriophages and their proteins

Structural biology of phage enzymes with antibacterial and antibiofilm properties, including endolysins and depolymerases

Phage therapy

Viromics and mobilomics

Microbiome analysis and manipulation

Microbial bioinformatics School of Pharmacy

Dr Yiwei Tian School of Pharmacy We are looking for dedicated PhD candidates with computer science, materials, and engineering backgrounds who are passionate about improving global me... Thermodynamic modelling, continuous manufacturing, liquid-liquid phase separation, digital innovation, non-classical nucleation, in vitro transcellular permeation, high throughput screening, nanocarriers, amorphous solids, invasive fungal infections. We are looking for dedicated PhD candidates with computer science, materials, and engineering backgrounds who are passionate about improving global medicine access through digital design and advanced engineering technologies. School of Pharmacy

Dr Irina Tikhonova School of Pharmacy We offer PhD study in cutting-edge computational approaches in computer simulations, data collection, mining, and analysis at the interface of chemist... We offer PhD study in cutting-edge computational approaches in computer simulations, data collection, mining, and analysis at the interface of chemistry and biology as well as state-of-the art functional assays, facilitating skills development in drug design research applicable in academia and industry. School of Pharmacy

Professor Michael Tunney School of Pharmacy Open to PhD applications in the field of Molecular and sensor based diagnostics for infection with a focus on chronic respiratory diseases, Role of t... Open to PhD applications in the field of Molecular and sensor based diagnostics for infection with a focus on chronic respiratory diseases

Role of the airway microbiome in health and disease

Bacterial pathogenesis, antimicrobial resistance and assessment of novel antibiotics and delivery methods. School of Pharmacy

Professor Gerd Wagner School of Pharmacy Research projects in the Wagner group are highly interdisciplinary: they typically involve Small molecule synthesis (e.g., carbohydrates, nucleotides... medicinal chemistry, chemical biology, organic synthesis, carbohydrate chemistry, nucleotide chemistry, antimicrobial resistance, enzymology, bioassays, glycobiology, drug discovery Research projects in the Wagner group are highly interdisciplinary: they typically involve Small molecule synthesis (e.g., carbohydrates, nucleotides, heterocycles)

Protein biochemistry, enzymology and bioassays We collaborate widely with research groups in academia, industry, and research institutes, and projects usually include placement opportunities. School of Pharmacy

Dr Lei Wang School of Pharmacy Open to PhD applications in the field of antimicrobial/anticancer discovery, biopharmaceutics, bioactive peptide design and optimization.... Open to PhD applications in the field of antimicrobial/anticancer discovery, biopharmaceutics, bioactive peptide design and optimization. School of Pharmacy

Dr Matthew Wylie School of Pharmacy Open to PhD applications in the field of: Design, synthesis and characterisation of biomaterials and device coatings, Bacterial-polymer surface inter... Biomaterials; stimuli-responsive drug delivery; surface modification; infection control Open to PhD applications in the field of: Design, synthesis and

characterisation of biomaterials and device coatings

Bacterial-polymer surface interactions

Polymer/metallic surface modification strategies for anti-fouling applications

Next-generation surface disinfectants School of Pharmacy

Dr Shuai Zhang School of Pharmacy Bio-inspired liquid-like coatings for medical devices to combat biofilms and associated infections ... Surface; Biomaterials; Coating; Medical device Bio-inspired liquid-like coatings for medical devices to combat biofilms and associated infections School of Pharmacy

Dr Min Zhao School of Pharmacy Open to PhD applications in the fields of Advanced polymeric dosage forms for oral administration, Amorphous solid dispersions and in-situ Amorphizat... Open to PhD applications in the fields of Advanced polymeric dosage forms for oral administration

Amorphous solid dispersions and in-situ Amorphization

Personalised medicines

Taste masking for paediatric medicines

Fixed dose combination for geriatric medicines and cancer therapy School of Pharmacy

Dr Mei Zhou School of Pharmacy Open to PhD applications in the field of Natural bioactive peptide discovery, Peptide pharmacology, Therapeutic peptide design and development, ... Open to PhD applications in the field of Natural bioactive peptide discovery

Peptide pharmacology

Therapeutic peptide design and development School of Pharmacy
