

## Engineering Vibration

The God of the Bible is not merely one of a plethora of gods from which we may pick and choose to worship nor is He to be put on par with other supposed deities. He is the omnipotent Creator and Redeemer of mankind.

The Creator has revealed Himself in both science and history, and the two subjects are intertwined. It is just as wrong to leave God out of the study of bacteria and volcanoes as it is to leave Him out of the rise and fall of nations or the extinction of dinosaurs. God made everything and He sustains everything.

God the Father, in the power of God the Holy Spirit and through the agency of God the Son Jesus Christ, created everything that exists. The doctrine of the Trinity is not derived from pagan beliefs but was developed from the plain teaching of Scripture. God is one Being in three Persons.
