

Foundations of Materials Science and Engineering

The Department of Pharmacology and Molecular Sciences (DPMS) at The Johns Hopkins University School of Medicine seeks to discover, translate, and disseminate knowledge important for the development and application of new therapeutics. The DPMS pursues and promotes frontier research and training in diverse areas in drug discovery, protein chemistry, glyco- and lipid-pharmacology, anti-infective agents, oncology therapeutics, neuropharmacology, and clinical pharmacology. The DPMS also promotes the Hopkins core values of promoting diversity, maintaining high standards of safe and ethical behavior, and demonstrating civil and respectful conduct in all interactions with students, staff, and faculty colleagues.

Pharmacology Diversity, Equity and Inclusion Initiative (DEII)

Applications to the graduate program in Pharmacology and Molecular Sciences will be accepted through December 8, 2022 . Students from HBCUs and MSIs are also encouraged to apply to the Vivien Thomas Scholars Initiative. Combined applications to the graduate program and VTSI are due December 1, 2022 .
