

Systems Engineering with SysML/UML: Modeling, Analysis, Design (The MK/OMG Press)

The period (365 days, 6 hours, 9 minutes, and 9.54 seconds of mean solar time) spent by the sun in its apparent passage from a fixed star and back to the same position again: it is the true period of the earth's revolution, and the difference in time between this and the tropical year is due to the precession of the equinoxes.
