

Almost on its own, Tesla has proven that electric vehicles can be desirable, combining outstanding performance and high-tech interiors with usable driving range. The Model X crossover has room for up to seven. It's also the most expensive Tesla, featuring the unique Falcon Wing doors. You have your pick of two sedans: the larger, more expensive Model S is a hot rod. The smaller, less pricey Model 3 Performance isn't far behind. The company has also revealed its wildly styled pickup truck, the Cybertruck.
