If you get an error code while downloading and installing Windows updates, the Update Troubleshooter can help resolve the problem.

Select Start > Settings > System > Troubleshoot > Other troubleshooters. Next, under Most frequent, select Windows Update > Run.

When the troubleshooter is finished running, it's a good idea to restart your device.

Next, check for new updates. Select Start > Settings > Windows Update > Check for updates and then install any available updates.

If the problems aren't all resolved, try running the troubleshooter again to check for additional errors, or see [Fix Windows Update errors](#) and follow the troubleshooting steps.

For more Windows Update troubleshooting info, see [Troubleshoot problems updating Windows](#).
